Attaching the Propeller

Option Assembly Option | ! Warning Note When Assembling | Do Not Glue

! Glue the propeller to the movable axis only. Be careful not to glue it to the fuselage by mistake!!

! Put the axle together in this way.

Attaching the Canopy

! The canopy can reproduce both its opened and closed states. Choose one and attach it.

How to use the Masking Sheet

* Use these when painting the canopy.

1. Attach the masks to match the shape of the glass.
2. Cover the reverse side with masking tape as well.
3. Paint with the fuselage color, and then remove the masks.

*The masking sheet can be used for either the closed or open canopy. We recommend using them on the parts that you choose.

Formation Lights and Pitot Tube

! Warning Note When Assembling

! Attach the formation lights to the upper wings and the wingtips. Insert and attach the pitot tube to the front of the right wing.

Antenna Mast

! As a final embellishment, attach the antenna, and it's complete!
