How to Attach Decals

1. Cut out the decal part you plan to attach using scissors or similar. Roughly remove the excess white area.
2. Fill a shallow palette or bowl with water, and soak the decal for about 10 seconds. Make certain the entire decal is immersed in the water during this time.
3. Remove the decal from water and move it to the place you intend to attach it. Attach it by sliding it carefully off the backing.
4. Adjust the positioning using tweezers, and use a clean cloth or cotton swab to smooth out any air bubbles and remove excess water. Once it has dried you're finished.
