

Attention!

This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15.

This item is intended for use with the Zoukei-mura 1/32 "P-51D Mustang".

The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.

In order to properly express the shape of the sculpts, it was unavoidable for some parts to have sharp edges. Please be careful!

Building the US Military Mechanics

The tense moments of servicing the engine.
 The mechanics also fight battles every day...
 Build the characters that your imagination creates in the world of the SWS.

Mechanic A

Mechanic B

Build as indicated in the diagram. The right and left feet will resemble each other, so please make sure to confirm the shape of each foot before attaching.

Figure Positioning

The paint job shown is an example. The figures shown in the image are samples. The 1/32 "P-51D" shown in the image is sold separately, and not included.

Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that everything is included.

To use this item, tools such as nippers, craft knife, files, sanding papers, instant glue, etc., are required, so please prepare them.

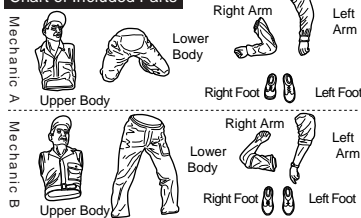

Please prepare the parts first. You can remove seam lines and gate marks with tools such as nippers, a craft knife and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper. In the case that mold details are lost, you can recover them with tools such as spatulas.

During assembly, adjust the orientation of each part while checking the balance and pose of the entire kit. Use a pin vise and drill bit to open a hole on both sides of each gluing surface, then insert the ends of a brass wire into the holes to connect the sides. This will greatly increase the strength of each joint. (Using the wires without glue to temporarily build a figure is called dry fitting. We recommend doing so in order to check each figure's balance.) Base preparation is required before painting. Please thoroughly finish the base with a coat of surfacer spray (otherwise, the paint will chip off as time passes).

With regard to paint, after taking personal safety and the global environment into consideration, we recommend using "Vallejo Colors" acrylic hobby paints for the new century. Please check historical references regarding the US AAF and the assembly manual of the 1/32 "P-51D" Mustang, and finish your Mustang in your preferred color scheme.

When it comes time to use the tools and paints, please carefully follow the individual instructions respective to each tool for your safety.

Chart of Included Parts

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.
