

### Attention!

This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15. This item is intended for use with the Zoukei-mura 1/32 "P-51D Mustang". The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged. In order to properly express the shape of the sculptures, it was unavoidable for some parts to have sharp edges. Please be careful!

## 1/32 "P-51D Mustang" Parts Installation Instructions

These parts should be installed while building the 1/32 P-51D Mustang aircraft kit. Please also refer to the kit assembly manual.

### Exchanging the AN/M2 12.7mm Machine Gun Barrels

Refer to the P-51D's manual **p25** -5.A

If a part gets stuck during the process of insertion, most likely there are burrs inside the barrel shaft. Please do not force them through, as damage may occur to the parts. Instead, use a 1mm drill bit to smooth out any burrs on the inside of the shaft before resuming building.

Cut the barrels off of the machine gun parts (A-6, 7, 8, 9, 10, 11) at the red line in the diagram, then use a 1mm drill bit to open holes into which the metal barrels can be inserted, as indicated in the diagram.

### Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that everything is included. To use this item, please refer to the assembly manual of the 1/32 "P-51D Mustang" as well.

To use this item, some basic tools are required (please see page 5 of the kit assembly manual). Please prepare accordingly.

These parts are intended to replace the AN/M2 machine gun barrels in the 1/32 "P-51D Mustang" kit as a 1:1 swap. To replace the barrels of the AN/M2 machine guns, first cut the barrel parts off of the parts included in the kit, then clean and smooth the remaining areas. Open holes using the basic tools (see page 5 of the kit assembly manual) of a pin vise and drill bit (1mm diameter) before installing the metal barrel parts.

Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement. Please finish with a coat of metal primer or similar (otherwise, the paint will chip off as time passes).

With regard to paint, after taking personal safety and the global environment into consideration, we recommend using "Vallejo Colors," acrylic hobby paints for the new century. Please check historical references regarding the US AAF, and finish your Mustang in your desired color scheme.

When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool of your safety.

### Chart of Included Parts

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.
