Wood Grain Decal Textures

In this Wood Grain Decal Set there are 6 decal sheets with 8 wood grain textures. Choose your favorite texture and apply it to your kit. You can change and apply the Wood Grain Decals to each outer panel of the Zoukei-mura 1/32 Horten kit.

How to Apply the Wood Grain Decals

The Wood Grain Decal Set is meant to reproduce the wooden outer panels of the real Horten by applying the wood grain textures on the outer panels of the Zoukei-mura 1/32 Horten kit. Please follow the procedure illustrated below to properly use the decals.

※The product may differ from the picture.

Applying Process

1. Prepare the surface of the outer panel parts where you will apply the Wood Grain Decals.
2. Paint the parts in the basic color of the Wood Grain Decals to be used.
You can obtain a more realistic effect by changing the color tone of each panel.
3. Apply the Wood Grain Decals as normal decal sheets.
4. If parts and decals do not adhere and air is in between, use Mark Setter to fix the decals.

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.

Purchasers from VOLKS Japan
