

Attention!

- This item is meant for hobbyists 15 years of age or older. Please don't give this item to children under 15.
- This item is intended for use with the Zoukei-mura, 1/32 "Horten Ho 229"
- The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.
- In order to properly express the shape of the sculptors, it was unavoidable for some parts to have sharp edges. Please be careful.

Front Tire Assembly

When using the weighted tires parts (sold separately), the accuracy of the kit increases considerably.

Important Points for Assembly

Before opening the bag, please carefully read this instruction manual and verify that all the parts are included. Please also refer to the 1/32 "Horten Ho 229" instruction manual to use these parts.

To build this kit, a big pincher, a cutting knife, sandpaper, waterproof sandpaper, instant glue, and Metal Primer spray are required. Please make sure they are at hand before starting your work.

This kit is made with metal. Parts are remodeled. After cutting with the large pincher the "gate" made during production, scrape the flash with sandpaper and polish the surface using waterproof sandpaper. Because the blade of nippers might break up, please use caution. After roughly sharpening the "parting lines" with the cutting knife and the sandpaper, clean up and polish the surface with waterproof sandpaper. Be careful not to damage the parts.

To affix the parts of the kit, please use instant glue. Plastic do not use glue dedicated to plastic models.

Before painting, make a primer coat using the Metal Primer. (Without primer coat, paint may peel.)

The recommended brand for painting your kit is the latest line of paint from Vallejo Color, due to its non-toxicity and environmental friendliness. While referring to resources on historical Luftwaffe aircrafts, you may paint the model with the coloring of your choice.

Please carefully use the tools and the solvents used for assembly and painting by referring to their instruction manuals.
