# Wood Grain Photo-Etched Mask

**Type 1**  
**1/32**  
Horten  
**Ho 229**

**Straight Grain Pattern**

What is a straight grain:  
Depending on the  
area cut from the  
log, the wood grain  
pattern shows  
almost parallel  
wood rings.

Sample Model: SWS 1/32 Horten Ho 229

## How to use

# Everyone can now easily reproduce wood by "painting"!!

## Item Characteristics

- ① This item reproduces detailed wood grain with photo-etching.
- ② When painting, you can use this item just by pressing it on the part with your hands.
- ③ After painting, you can remove cleanly the paint from the sheet in order to use it again and again.

## Process

Practice with some unnecessary parts, before you actually paint.

Sample Model: SWS 1/32 Horten Ho 229

**1 Base Coating**  
Mask the area (painting every mold of the panel will give a more realistic effect) around the surface where you want to use the wooden painting, then base coat with a wooden-light color and let it dry.

**2 Wooden Painting**  
After the base coat has dried, press the Wood Grain Photo-Etched Mask on the part making sure it doesn't move, and then use your airbrush just once to paint with a darker wooden-color and recreate the grain pattern.

**3 Finish**  
Once you are sure the darker color has completely dried out, remove the masking gently and the work is done. Change the pattern or the masking position on each panel and paint.

## Application

- Aircrafts' wooden outer panels
- Ship models' wooden parts
- AFV wooden parts

### Attention

- This item is suited for people over 15. Do not hand this out to children under 15.
- Do not ingest parts or bag by mistake. You might choke.
- You may hurt yourself unintentionally during use, so pay attention. Also, do not hand this out to children.
