

### Attention!

- This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15.
- This item is intended for use with the Zoukei-mura 1/32 "Dorrier Do 335".
- The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.
- In order to properly express the shape of the sculptures, it was unavoidable for some parts to have sharp edges. Please be careful.

FOR THE  
**SUPER WING SERIES**  
1/32 Dorrier  
**Do 335**  
These are extra parts to be used with the "Dorrier Do 335" kit.

1/32 "Dorrier Do 335" Assembly Instructions These parts will be inserted when assembling the 1/32 "Dorrier Do 335" kit. Please refer to the instruction manual of the "Dorrier Do 335."

## ◆SC-500 Bomb Assembly

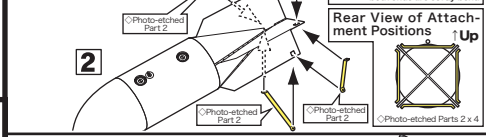

1 Assemble following the ① ② ③ order.  
If suspended on the aircraft, don't attach the main body of the bomb. Cut and attach the photo-etched parts 3 and 4.

2 Cut two photo-etched parts 1 (be careful as the shape differs!) and as shown, attach to the assembled bomb main body while building the fin.

3 Attach the photo-etched part 2 to the fin to complete the work.

### ◆◆Important Points for Assembly◆◆

- Before opening the bag, please carefully read this instruction manual and verify that all the parts are included.
  - To build this kit, please prepare the following tools:
    - Nippers
    - Cutter
    - Nippers (scissors)
    - Tweezers
    - Pin vise
    - 1mm drill blade
    - Instant glue.
  - You can remove seam lines and gate marks with tools such as nippers, a craft knife and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper. In the case that mold details are lost, you can recover them with tools such as spatulas.
  - Please use nippers (scissors) for etching parts when cutting off the etching parts. Use a file to remove flashes.
  - To affix the parts of the kit, please use instant glue. Please do not use glue dedicated to plastic models.
  - Before painting, make a primer coat using the Metal Primer. (Without primer coat, paint may peel.)
  - The recommended brand for painting your kit is the latest line of acrylic paint from Vallejo Color. Please refer to the Zoukei-mura 1/32 "Dorrier Do 335" Instruction Manual and Luftwaffe historical manuals to paint the model with the coloring of your choice.
- ※Please carefully use the tools and solvents for assembly and painting by referring to their instruction manuals.

### Chart of Included Parts

◇ Resin Parts

- Warhead
- Bomb (rear part)
- Bomb (main body)
- Suspension

◇ Photo-etched Parts

1/32 SC500 Bombs

Cut and use each part singularly.

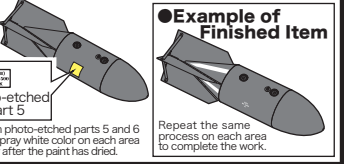

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.

## ◆How to Paint Markings

You can paint markings on the SC-500 Bomb as the photo-etched parts 5 and 6 are used as stencil templates.

After painting and letting dried the bomb, attach photo-etched parts 5 and 6 with masking tape on their dedicated positions. Spray white color on each area after masking it. Remove the masking tape gently after the paint has dried.

## ◆Suspension on the "Do 335"

After attaching the suspension to the bomb, attach to the bottom of the "Do 335" bomb storage to suspend the bomb.
