

Attention

- This item is meant for people 15 years of age or older. Please do not give this item to children under 15.
- Please use this item with the Zoukei-mura 1/32 "Ta 152 H-0" kit.
- Please be careful not to swallow small parts and the polyethylene bag as they present a suffocation risk. Please do not drop or bend the parts in unintended ways as they may be damaged.
- In order to faithfully reproduce the original design, some parts have sharp edges. Please be careful when handling.

ZOUKEI-MURA PRESENTS
SUPER WING SERIES
1/32
Ta 152 H-0
Extra part to assemble and use with your SWS kit.

1/32 "Ta 152 H-0" Assembly Instructions

Add these parts to your 1/32 "Ta 152 H-0" when assembling. Please refer to the instruction manual of the 1/32 "Ta 152 H-0".

◇ Pilot Assembly

Please shape, build and paint each part by following the important Points for Assembly.

■ Pilot A

Tube attachment location.

■ Pilot B

Gate Number: ●

Tube attachment location.

■ Pilot C

Gate Number: ●●

Choose either part "Head 1" or "Head 2", and assemble.

◆ Important Points for Assembly ◆

- Please carefully read the assembly manual and make sure that everything is included before starting the assembly.
- For building this kit, tools such as nippers, craft knives, files, sanding paper, pin vises & drills, reinforcing metal wires, and instant glue are required. Please prepare them.
- First, shape the parts by removing "seam lines" and "gate marks" with tools like nippers, craft knives or files. Urethane resin is softer than the plastic material used for the kit, so be careful not to carving too much. "Air bubbles" can be filled with putty (epoxy, plastic, etc.), and then polished with sanding paper. In case mold details are buried, recover them with tools such as spatulas.
- During assembly, adjust the orientation of each part while checking the balance and pose of the entire kit.
- Please use instant glue for cementing the parts. Be careful that the parts cannot be glued with plastic model kit cement.
- We recommend using brass wires (sold separately) to reinforce the areas where the parts are glued together. Use a pin vise and drills to open a hole on both sides of each gluing surface, then insert the ends of a brass wire into the holes to connect both sides. This will greatly increase the strength of each joint. (Using the wires without glue for temporary build is called dry fitting. We recommend doing so in order to check each figure's balance.)
- Base preparation is required before painting. Please thoroughly finish the base with a coat of surfacer spray (otherwise, the paint will chip off as time passes).
- We recommend the water-based "Vallejo Color" paints for painting your kit, due to its environmental friendliness. While referring to resources on historical Luftwaffe aircrafts, you may paint the model with the coloring of your choice.
- ※ When using tools and paints for assembly and painting, please carefully follow the respective instructions manuals for your safety.

Chart of Included Parts

There is a "●" mark on the gate of pilot B, and a "●●" mark on the gate of pilot C. Please check before cutting.

■ Pilot A	■ Pilot B	■ Pilot C

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact our customer service within two weeks of your purchase with your full name and order number.
