◆◆Important Points for Assembly◆◆

- Please carefully read the assembly manual prior to opening and make sure that everything is included.
- To use this item, tools such as ●nippers, ●craft knife, ●files, ●sanding papers, ●instant glue, etc., are required, so please prepare them.
- Please prepare the parts first. You can remove "parting lines" and "gate marks" with tools such as nippers, craft knives and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper, in case that mold details are lost, you can recover them with tools such as spatulas.
- During the assembly, adjust each part's angle of attachment while checking the balance and pose of the entire kit.
- Please use instant glue for cementing these parts. Please note that these parts cannot be glued with plastic model kit cement.
- Process the surface of the parts before painting. Please prepare the surface of the parts by spraying a surface on the entire surface (otherwise, the paint may peel as time passes).
- The recommended brand for painting your kit is the latest line of paint from Vallejo Color. Please refer to the Zoukei-mura 1/48 "Horten Ho 229" Instruction Manual and Luftwaffe historical manuals to paint the model with the coloring of your choice.

※Before using tools and paints, please carefully read their instructions manuals and use them safely.
