BLACK

**Buckle:**

70997 (MC171)  
SILVER

### ◆◆Important Points for Assembly◆◆

- Before opening the bag, please carefully read this instruction manual and verify that all the parts are included.
- To use this item, tools such as ●nippers, ●craft knife, ●files, ●sanding paper, ●instant glue, etc. are required, so please prepare them.
- Please prepare the parts first. You can remove "parting lines" and "gate marks" with nippers, craft knives and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper, in case that mold details are lost, you can recover them with tools such as spatulas.
- During the assembly, adjust each part's angle of attachment while checking the balance and pose of the entire kit.
- Please use instant glue for cementing these plastic. Please note that these parts cannot be glued with plastic model kit cement.
- Process the surface of the parts before painting. Please prepare the surface of the parts by spraying a surfacer on the entire surface (otherwise, the paint may peel as time passes).
- The recommended brand for painting your kit is the latest line of acrylic paint from Vallejo Color. Enjoy painting in the color scheme of your choice, based on the Vallejo Color Guide and your own reference materials.

※Before using tools and paints, please carefully read their instructions manuals and use them safely.

### Chart of Included Parts

There is a "•••" mark on the gate of Front Seat Pilot. Please check before cutting.
