

Attention!

This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15. Please use with the Zoukei-mura 1/32 "Shinden 2nd Edition Ah! My Goddess" kit. The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged. In order to properly express the shape of the sculpt, it was unavoidable for some parts to have sharp edges. Please be careful.

1/32 "Shinden" - Parts Installation Instructions

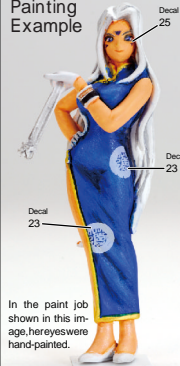

Please build the 1/32 Shinden 2nd Edition separately, and position the figures according to your preference when displaying the aircraft. You will gain a much better view of the world surrounding the Shinden 2nd Edition.

Building & Finishing Urd

Build as indicated in the diagram. Paint, then display according to your preference. The paint job shown in the image is an example. Her eyes, markings, and clothing patterns can be recreated by using the included decals.

Painting Example

In the paint job shown in this image, her eyes were hand-painted.

How to Use the Decals

Parts of Belldandy's and Urd's eyes and clothing can be recreated by using the included decals. Please follow the instructions below for each decal.

1. Cut out the decal (including the backing) you intend to use.
2. Soak it in water for 5-10 seconds.
3. Set the decal (including the backing) over its intended location to get a visual estimate, then slowly slide the decal off the backing to affix it.
4. Make any positioning adjustments before the decal dries.
5. After the decal has completely dried, use transparent water-based paint to give it a clear coat.

Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that everything is included.

To use this item, tools such as nippers, craft knife, files, sanding papers, instant glue, etc. are required, so please prepare them.

Please prepare the parts first. You can remove seam lines and gate marks with tools such as nippers, a craft knife and files. Urethane resin is softer than the plastic material used for the kit. So be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finish with sanding paper. In the case that mold details are lost, you can recover them with tools such as spatulas.

For assembly, adjust the direction of each part while checking the balance and pose of your entire kit.

Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement.

Base preparation is required before painting. Please thoroughly finish the base with a coat of surfacer spray (otherwise, the paint will chip off as time passes.)

When painting, we recommend "Vallejo Colors," paints of a new generation that are safer and more kind to the environment. Using the finished example photos included in the instructions as references, please paint according to your preference. The figures' eyes and clothing patterns can be reproduced using the included decals.

When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool for your safety.
