Armament Crew Set Assembly Instructions

**Kit's Parts Assembly**
Please carve this section and make the edge smooth and clean.
Before assembling the 1/32 "Ta 152 H-1", please process the following parts.

- Careful not to mix up the part with part D-1.

**Display Example**

**Armament Feeding Crew Assembly**
Please assemble the resin parts of this set after reading the "Important Points for Assembly".

**Armament Feeding Crew Display**
When assembling this set, the processed outer panel (part D-13) and the MK108 magazine pile up. As shown below, please remove each hatch and display the crew figures. (Refer to the "Example" above.)

1. Fuselage Hatch
2. Magazine Hatch
3. Left Arm
4. Left Leg
5. Right Arm
6. Body
7. Ammunition Belt 1
8. Ammunition Belt 2
9. Ta 152 H-1 Plane
10. Magazine Hatch

**Important Points for Assembly**
- Carefully read the assembly manual prior to opening and make sure that everything is included.
- Use this item, tools such asppers, craft knife, files, sanding papers, constant glue, etc., are required, so please prepare them.
- Please prepare the parts first. You can remove seam lines and gate marks with tools such as pippers, a craft knife and files. Urethane resin is thinner than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper. In the case that mold details are lost, you can recover them with tools such as scalpels.
- During assembly, adjust the orientation of each part while checking the balance and pose of the entire kit.
- Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement.
- We recommend using brass wire (sold separately) to reinforce the areas where the parts are glued together. Use a pin vise and drill bit to open holes on both sides of each gluing surface, then insert the ends of a brass wire into the holes to connect the sides. This will greatly increase the strength of each joint. (Using the wires without glue to temporarily build a figure is called dry fitting. We recommend doing so in order to check each figure's balance.)
- Base preparation is required before painting. Please thoroughly finish the base with a coat of surfacer spray (otherwise, the paint will chip off as time passes).
- The recommended brand for painting your kit is the environment-friendly latest line of paint from Vallejo Color. Please refer to the Zoukei-mura 1/32 "Ta 152 H-1" Instruction Manual and Luftwaffe historical manuals to paint the model with the coloring of your choice.
- When it comes time to use tools and paints, please carefully follow each tool instruction for your safety.
