

Attention!

This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15.
This item is intended for use with the Zoukei-mura 1/32 "A-1H" Skyraider.
The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.
In order to properly express the shape of the sculpts, it was unavoidable for some parts to have sharp edges. Please be careful.

How to Install the Machine Gun and Static Boom Set onto the 1/32 US Navy "A-1H" Skyraider

These parts are installed during assembly of the 1/32 "A-1H". Please check the assembly manual of the 1/32 "A-1H" as well.

How to Exchange the M3 20mm Machine Gun Barrels

Refer to the A-1H's manual **p19 and 20**

As shown in the illustration, please cut the barrels off of the machine gun parts (C-5, C-6, C-7 and C-8), then replace them with the metal machine gun barrels from this set. Adjust the position of the parts to the red line in the illustration. Make holes at the attachment points with a pin vise and a 1.5mm drill so that the metal barrels can be inserted.

Outer Wing Right Side Inner Wing Side Outer Wing Left Side

You can choose barrels either with or without flash suppressors.

If you prefer to recreate this shape, you can transfer them to the metal barrels when you cut them off of the machine guns.

Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that all the parts are included. Please check the assembly manual of the 1/32 "A-1H" Skyraider as well for more instructions.

To use this kit, basic tools (refer to p.5 of the A-1H's manual) are required. Please prepare them.

This set replaces the default M3 machine gun barrels and static boom of the 1/32 "A-1H" Skyraider". To use them, the default barrels must be cut off and adjusted. Then, please make holes with a pin vise and a 1.5mm diameter drill (included in basic tools listed in the A-1H's manual p. 5) to insert the metal barrels of this set.

Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement. Base preparation is required before painting. Please finish with a coat of metal primer or similar (otherwise, the paint will chip off as time passes.)

With regard to paint, after taking personal safety and the global environment into consideration, we recommend using "Vallejo Colors," acrylic hobby paints for the new century. Please check the references regarding the US Navy at that point and the assembly manual of 1/32 "A-1H" Skyraider, and finish your Skyraider in the color scheme as you prefer.

When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool for your safety.

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.

How to Install the Static Boom and Antenna

Refer to the A-1H's manual **p31**

Please substitute the metal part for the default part while assembling the 1/32 "A-1H" Skyraider".

Install the metal parts instead of L-4
