SWS 1/32 P-51D
Other US Army aircrafts

Assembly
Let the belt pass through the metal parts cut from the photo-etched parts, and assemble as shown below while adjusting the belt's length. Attach the high-strength paper of the belt part with some wood bond. Attach the belt end and the seat part with a double sided tape. Attach the two high-strength papers as in the figure, and assemble as shown below by referring to the marks (from A to G). Photo-etched parts numbers are printed on the cardboard, so check them first and cut.

Contents

0.2mm thick, high-strength color paper x 2
Photo-etched parts x 1

High-strength paper - "Fabric" color

High-strength paper - "Skin" color

Photo-Etched parts

There is a "loop-shaped" tip in the left lower angle of the photo-etched parts. You can reproduce the "seam line" by inserting it while pushing in the belt.

Product Specifications

1. Very effective detail up!! Build in the cockpit and your kit gets immediately cooler!
2. A real sense of power!! Two different materials! Smooth fabric/leather and sharp metal make this masterpiece of seatbelts reproducible!
3. Easy assembly!! You can recreate real-looking seatbelts even without painting!

Attention
This item is suited for people over 15
Do not hand this out to children under 15.
Do not ingest parts or bag by mistake. You might choke.
You may hurt yourself unintentionally during use, so pay attention.

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number. Purchasers from VOLKS Japan International Web Site: Please contact imos@volks.co.jp. Purchasers from VOLKS USA: Please contact service@volkususa.com. Please note that items which have been opened, or worked with, can't be exchanged. Thank you for your understanding.
