How to use
Everyone can now easily reproduce wood by “painting”!!

Painting Instructions
Press firmly
Press the Wood Grain Photo-Etched Mask (this item) on the model part to be painted, then take your airbrush and
Just blow once.
Your Airbrush

Item Characteristics
1. This item reproduces detailed wood grain with photo-etching.
2. When painting, you can use this item just by pressing it on the part with your hands.
3. After painting, you can remove cleanly the paint from the sheet in order to use it again and again.

Process
Practice with some unnecessary parts, before you actually paint.

1. Base Coating
2. Wooden Painting
3. Finish

Mask the area (painting every mold of the panel will give a more realistic effect) around the surface where you want to use
the wooden painting, then base coat with a wooden-light color and let it dry.
After the base coat has dried, press the Wood Grain Photo-Etched Mask on the part making sure it doesn’t move, and then use
your airbrush just once to paint with a darker wooden-color and recreate the grain pattern.
Once you are sure the darker color has completely dried out, remove the masking gently and work is done. Change the pattern or the masking
position on each panel and paint.

Application
•Aircrafts’ wooden outer panels
•Ship models’ wooden parts
•AFV wooden parts

1/32 Wood Grain Photo-Etched Mask Type 2

Attention
This item is used for children over 15. Do not hand this out to children under 15.
Do not ingest parts or bug by mistake. You might choke.
Subject to national laws on unemployment during use, so pay attention. Also, do not hand this out to children.

Please note that items which have been opened, or worked
with, can’t be exchanged. Thank you for your understanding.
