SUPER WING OPTIONS

1/32 Dornier Do 335A-0 Pfalz

Pilot Figure

This is a resin kit. Please note that these parts are used with the plastic model kit cement. Instant glue should be used for these parts.

Chart of Included Parts

- Right Arm
- Left Arm
- Body

How to Insert the Pilot in the Aircraft

- Once you have assembled the Pilot Figure, seat the pilot on the cockpit seat described page 51, section 3-7 in the 1/32 “Dornier Do 335” Instruction Manual, and then attach the canopy. The control stick must be held with pilot’s both hands, so when you attach the right and left arms to the pilot’s body, seat the pilot in the cockpit first, and fix the arms’ positions in order they can both grab the control stick.

Important Points for Assembly

- Please carefully read the assembly manual prior to opening and make sure that everything is included.
- To use this item, tools such as scissors, craft knife, files, sanding papers, instant glue, etc., are required, so please prepare them.
- Please prepare the parts first. You can remove seam lines and gate marks with tools such as nippers, a craft knife and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper. In the case that mold details are lost, you can recover them with tools such as sprues.
- During assembly, adjust the orientation of each part while checking the balance and pose of the entire kit.
- Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement.
- We recommend using brass wire (sold separately) to reinforce the areas where the parts are glued together. Use a pin vise and drill bit to open a hole on both sides of the gluing surface, then insert the ends of a brass wire into the holes to connect the sides. This will greatly increase the strength of each joint. (Using the wires without glue to temporarily build a figure is called dry fitting. We recommend doing so in order to check each figure’s balance.)
- Glaze preparation is required before painting. Please thoroughly finish the base with a coat of primer spray (otherwise, the paint will chip off as time passes).
- The recommended brand for painting your kit is the latest line of paint from Vallejo Color, due to its non-toxicity and environmental friendliness. While referring to resources on historical LuFwaffe aircraft, you may paint the model with the color of your choice.
- When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool for your safety.

Pilot Assembly

Pay attention to the “Important Points for Assembly” when you assemble the resin parts of this set.

Color Reference

These parts will be inserted when assembling the 1/32 “Dornier Do 335” kit. Please refer to the instruction manual of the “Dornier Do 335.”

1/32 Dornier Do 335 Instruction Manual

3-1. H Ejection Seat

Seat the Pilot you have assembled. Once you have it seated, attach the canopy opened or closed.

Cockpit Seat Pilot Seated

We take the utmost of care when overseeing manufacturing, but if your kit is among the very few percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.
