

Attention!

- This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15.
- This item is intended for use with the Zoukei-mura 1/48 "J7W1 SHINDEN".
- The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.
- In order to properly express the shape of the sculpt, it was unavoidable for some parts to have sharp edges. Please be careful.

"J7W1 SHINDEN"

1/48 No.1

Forward Facing Pilot

This is a resin kit. Please note that these parts cannot be glued with plastic model kit cement. Instant glue should be used instead.

Forward Facing Pilot

1/48 "J7W1 SHINDEN" Assembly Instructions

These parts will be inserted when assembling the 1/48" J7W1 SHINDEN "kit. Please refer to the instruction manual of the "J7W1 SHINDEN."

Pilot Assembly

Please follow the important Points for Assembly when assembling the urethane resin parts in this kit.

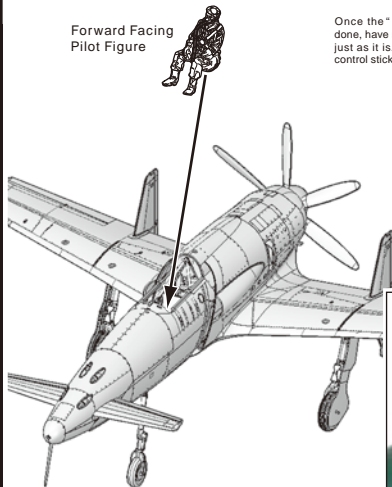

Heat the part with a hair-dryer, and bend it according to your preferences before assembling. (Be careful not to burn yourself!!)

Inserting the Pilot into the Model

Forward Facing Pilot Figure

Once the "Forward Facing Pilot" assembly is done, have it seated in the 1/48 Shinden's cockpit just as it is. Then, adjust his both hands on the control stick and his legs on the ladder pedals.

The real product may differ. The Zoukei-mura 1/48" J7W1 SHINDEN "is not included in this set.

Assembled Example

Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that everything is included.

To use this item, tools such as nippers, craft knife, files, sanding papers, instant glue, etc., are required, so please prepare them. Please prepare the parts first. You can remove seam lines and gate marks with tools such as nippers, a craft knife and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sanding paper. In the case that mold details are lost, you can recover them with tools such as spatulas.

During assembly, adjust the orientation of each part while checking the balance and pose of the entire kit.

Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement.

We recommend using brass wire (sold separately) to reinforce the areas where the parts are glued together. Use a pin vise and drill bit to open a hole on both sides of each joining surface, then insert the ends of a brass wire into the holes to connect the sides. This will greatly increase the strength of each joint. (Using the wires without glue to temporarily build a figure is called dry fitting. We recommend doing so in order to check each figure's balance.)

Base preparation is required before painting. Please thoroughly finish the base with a coat of surfacer spray (otherwise, the paint will chip off as time passes).

The recommended brand for painting your kit is the latest line of paint from Vallejo Color, due to its non-toxicity and environmental friendliness. While referring to resources on historical Imperial Japanese Navy, you may paint the model with the coloring of your choice.

When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool for your safety.
