

⚠ Attention!

This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15. Please use with the Zoukei-mura 1/32 "Ta 152 H-1 "THE COCKPIT" Edition" kit. The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.

In order to properly express the shapes of the sculpts, it was unavoidable for some parts to have sharp edges. Please be careful.

Building Haptm. Erhard von Reinders

Please build by following the "Important Points for Assembly."

Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that everything is included.

To use this item, tools such as nippers, a craft knife, files, sandpaper, a pin vise and drills, reinforcing metal wire, instant glue, etc., are required, so please prepare them.

Please prepare the parts first. You can remove seam lines and gate marks with tools such as nippers, a craft knife and files. Urethane resin is softer than the plastic material used for the kit, so be careful to avoid carving too much. Air bubbles can be filled with putty (epoxy, plastic, etc.) or similar, then finished with sandpaper. In the case that mold details are lost, you can recover them with tools such as spatulas.

For assembly, adjust the direction of each part while checking the balance and pose of your entire kit.

Instant glue should be used for these parts. Please note that they cannot be glued with plastic model kit cement.

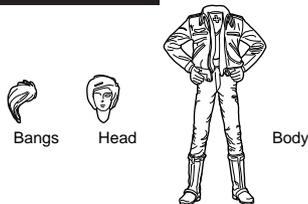

Thin metal wire (sold separately) works well to reinforce the areas where parts are glued together. Before gluing two surfaces together, open corresponding holes in both surfaces using a pin vise and drill bit, then insert the ends of a wire into the holes to increase the strength of the connection. (You can dry fit the parts by connecting them using the wire, but without gluing. This is useful when checking the overall balance of the parts.)

Base preparation is required before painting. Please thoroughly finish the base with a coat of surfacer spray (otherwise, the paint will chip off as time passes.)

When painting, we recommend "Vallejo Colors," paints for a new generation that are safer and more kind to the environment. Using the finished example photos included in the instructions as references, please paint according to your preference.

When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool or paint for your safety.

Chart of Included Parts

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.
