

### Attention!

This item is meant for hobbyists 15 years of age or older. Please do not give this item to children under 15.  
This item is intended for use with the Zoukeimura 1/32 "P-51D Mustang".

The polyethylene bags that contain the parts and assembly manual present a suffocation risk. Please do not drop the parts or bend them in unintended ways, as they may be damaged.

In order to properly express the shape of the sculpt, it was unavoidable for some parts to have sharp edges. Please be careful.

**These are extra parts to be used with the P-51D Mustang kit.**

## 1/32 "P-51D Mustang" Parts Installation Instructions

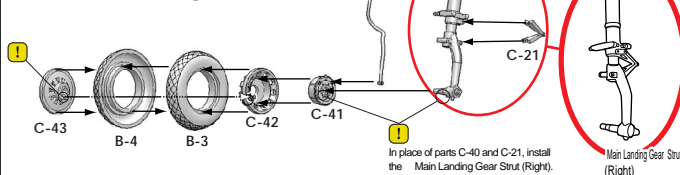

These parts should be installed while building the 1/32 P-51D Mustang aircraft kit. Please also refer to the kit assembly manual.

### Installing the Main Landing Gear Struts

When building the 1/32 "P-51D," please install the metal struts as shown below.

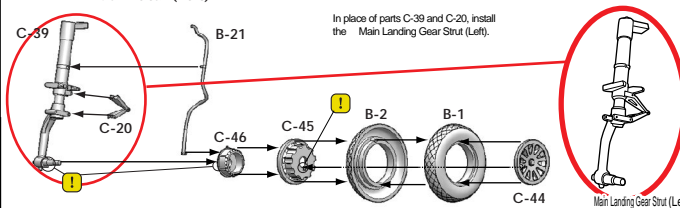

Refer to the P-51D's manual **p33.** -7.A -7.B

#### III-7. A Main Gear (Right)

In place of parts C-40 and C-21, install the Main Landing Gear Strut (Right).

#### III-7. B Main Gear (Left)

In place of parts C-39 and C-20, install the Main Landing Gear Strut (Left).

### Important Points for Assembly

Please carefully read the assembly manual prior to opening and make sure that everything is included.

To use this item, please refer to the assembly manual of the 1/32 "P-51D" Mustang as well.

To use this item, tools such as nippers, craft knife, files, sanding papers, instant glue, metal primer spray, etc. are required, so please prepare them.

These parts are made of white metal and will need to be prepared before use. You can remove gate marks with a large nipper and remove any excess with a craft knife. Then, finish with sanding papers. It may damage the blades if you use a fine nipper, so please be careful. For the seam lines, scrape them off with a knife and then finish with sanding papers. Please be careful not to damage the parts while you are working on them.

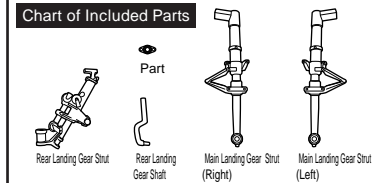

Instant glue should be used for these parts. Please note that they cannot be glued with a plastic model kit cement.

Spray metal primer to finish the base before painting.

With regard to paint, after taking personal safety and the global environment into consideration, we recommend using "Vallejo Colors," acrylic hobby paints for the new century. Please check references regarding the US AAF at that point and the assembly manual of 1/32 "P-51D" Mustang, and finish your Mustang in your preferred color scheme.

When it comes time to use tools and paints, please carefully follow the individual instructions respective to each tool for your safety.

### Chart of Included Parts

We take the utmost of care when overseeing manufacturing, but if your kit is among the very small percentage that contains a defective part, please contact customer service within two weeks of your purchase with your full name and order number.

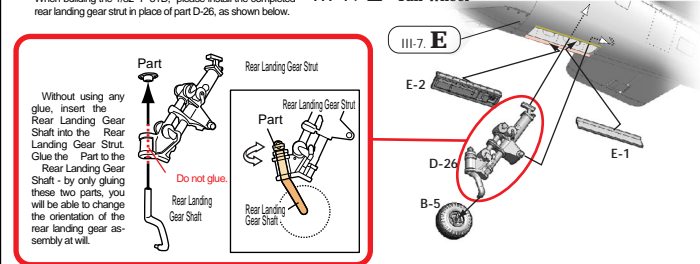

Purchasers from VOLKS Japan International Web Site:

Purchasers from VOLKS USA:  
Please contact service@volksusa.com.

### Building & Installing the Rear Landing Gear Strut

Refer to the P-51D's manual **p34.** -7.F

When building the 1/32 "P-51D," please install the completed rear landing gear strut in place of part D-26, as shown below.

#### III-7. F Tail Wheel

By using these parts in combination with the "Weighted Tires" (sold separately), it is possible to produce a final finish even closer to the actual aircraft.
